

Graphic Application Tools

At 3M, we are continuously looking for ways to improve the large-format graphics industry. You can count on 3M to develop tools and materials to help you achieve the best possible results for your customers. These graphic installation tools are designed for comfort and assist the installer in applying large-format graphics easier and faster.

3M™ Hand Applicator PA-1
Inexpensive, reusable squeegee-type applicator is flexible yet durable. This tool is the perfect solution for applying film or premask.

3M™ Low Friction Sleeve SA-1
Reusable paper sleeve slips over the PA-1 applicators to protect the substrate from being marked or scratched.

3M™ Power Grip Applicator for 3M™ Comply™ Adhesive Films CPA-1
Designed only for films with the Comply™ Adhesive feature. The applicator makes it easy to cover large areas with a uniform distribution of pressure. The felt-wrapped edge disperses air evenly for a virtually bubble-free application, and the rounded grip is more comfortable for the installer.

3M™ Rivet Brush Applicator RBA-1
Graphics are easier to install over rivets using this traditional applicator tool.

3M™ Power Grip Rivet Brush Applicator RBA-3
Burnish all films over rivets with ease. The larger handle grip is more comfortable and encourages full arm movement. Burnish film over rivets faster with the stiffer bristles.

3M™ Air Release Tool 391x
Puncture film that has already been applied to a substrate to remove entrapped air bubbles.

3M™ Tape Primer 94
Used to promote adhesion of 3M films to surfaces such as many plastics and paints. Recommended for use especially when conforming film to deep channels.*

* 3M™ Controltac™ Graphic Film IJ380 does not require primer 94 in deep channels on vehicle wraps.

3M™ Power Grip Multi-Pin Air Release Tool MPP-1
Features a uniquely designed grip. With multiple pins, only a single motion is needed per rivet, saving time during installation on all films.

3M™ Power Grip Magic Pad Rivet Applicator CMP-1
Designed exclusively for 3M™ Controltac™ Graphic Films with Comply™ Adhesive. The 3M magic pad rivet applicator, with its large foam pad, makes it easy to conform heated film around rivets. The larger handle grip is designed for comfort.

3M™ Edge Sealing Tape 8914
Used to improve the resistance to environmental damage and enhance the durability of the graphics.

3M™ Vehicle Channel Applicator Tool VCAT-2
Custom designed durable soft foam roller for vehicle channels.

3M™ Roller L (large)
Custom designed durable firm roller for vehicle channels.

3M™ Roller S (small)
Custom designed durable firm roller used as finishing tool in vehicle channels.

3M™ Rapid Roller Applicator CPA-2
Designed exclusively for 3M™ Controltac™ Graphic Films with Comply™ Adhesive. The 3M rapid roller applicator makes it easy to apply film. This tool has a rounded rubber grip that is more comfortable and encourages full arm movement.

Textured Surface Application Tools for Use with 3M™ Scotchcal™ Graphic Film for Textured Surfaces IJ8624

3M™ Textured Surface Applicator TSA-1
Specialized tool used to conform large areas of film onto a textured surface.

3M™ Textured Surface Applicator TSA-2
Specialized tool used to conform heated film to mortar joints and inside corners.

3M™ Textured Surface Applicator TSA-3
Specialized tool used to conform heated film around cut edges and in corners and mosaic-type applications.

3M™ Installation Kit for Textured Surfaces
Combines all of the necessary tools in one kit for installing textured surface graphics using film IJ8624. Includes Stinel® Heat Gun, TSA-1, TSA-2 and TSA-3.

3M™ Two-Handled Textured Surface Applicator TSA-4 for Large Areas
Increase installation productivity for graphics on textured surfaces. Requires heat gun, not included.
